

databrew

February 16th 2018 Call

Attendees:

Anna Roose, Nasrin Dilruba, Helen Powell, Joe Brew, and Ben Brew

Topics:

- **Introduction of attendees.**
- **Brief overview of available data**
 - Total of 8 different VA instruments - these need to be mapped to 3 formats.
 - Gambia is sufficient, but we are missing key pieces from Kenya and Mali.
- **Strategy for data mapping**
 - Creating a core language (intermediary) parent dictionary "Babel"
 - All translations must be two-way
 - Start with 1 or 2 dictionaries to gauge exactly how much time and effort will need to be put into the others.
- **Milestones**
 - Databrew will create the milestones and Anna will review and correct them if necessary.
 - After milestone 1, we can revisit our plan and adjust.
 - Each deliverable will be "self-contained".

Action items:

- **Joe** to email **Anna** with current understanding / map of datasets, needs.
- **Joe** to email **Anna** with milestones.
- **Anna** to edit milestones.

data-driven decision-making
